I love this game it\u2019s so simple and easy to pick up. It\u2019s a calm game u can hear some faint melodies wile walking through the town and in my opinion one of the most beautiful pixel games out there. I highly recommend this game and I hope a new big update will arrive soon. Btw if u have a sibling and he or she wants to play with you u can play this game on a shitty laptop
10V10. Good game. Battleships one shot weak ships, subs destroy battleships, no one uses carriers, and cruisers rule the seas.. This game makes me sad.

I mean, it's obviously a Unity abortion that shouldn't have made it on Steam to begin with. Aside from the *slight* potential it had to improve, though, it was good as a bad game that you could have fun with *as a bad game* - kind of like Call of Duty meets Mirror's Edge meets Unity assets. Plus, I got it for free in a developer giveaway.

But from what I've seen, and based off [Jim Sterling's video](#), you can't even connect to any servers anymore. Looking on the Community hub, I saw the developers pretty much openly admitting they abandoned this game.

Which means, among other things, you can't get any of the achievements anymore.

Fortunately, Steam Support removed this game from my account when I asked them to. That doesn't change the fact that the devs' free giveaway was a curse.

And that makes me sad.. I kickstarted this for Neil Gaiman. Suffered through the levels to hear his voice at the cut scenes, but am entierly underwhelmed. Levels must be restarted once all options are exhausted. More an exercise in clicking the items in the right order than solving a puzzle. Music is good. Might have just written a short story set to the spooky music rather than make us wait for a sub par game. Dissapointing.. The 1:1 port with mobile version making the desktop version incredibly painful to use - extra clicks for virtually every single user action makes the game very painful and slow to play compared to its predecessors!

For this reason alone I've stopped playing it, despite the slickness of the UI and whatever improvements there may be.. my kink is being giant and overpowering lots of small naked barbarians, this game let me live that fantasy that I thought I never would be allowed to live, thank you from the bottom of my balls

Amazing software! Just passed my theory this morning first time and I only used this amazing software, anyone going to do their theory test should buy this software!! Practice for the inevitable time you snap and shoot up your school.. Love it. Best title game for a game!. not worth the money. you can spend some time with it but i personally dont like it. I love this Game! I have played it since it came out when I was younger and I still to this day replay it! :). Reasearcrh all the free music makers first for chiptunes and you'll find this the most hasle free paid software to make chiptunes that's easy to use. Also, I have Audacity (Freeware) to handle more complcated mixing like voice or other wavs from other programs. Audacity will also export as a mp3.. Fast paced and simple yet, complex Soccer game. Requires a ton of teamwork and cooperation. All in all nice little game to sink a bit of your free time into!
